

FIND THE SIZE OF YOUR BRACELET

To know the size of your wrist, follow the instructions below and always use the specific size chart for each type of bracelet. If you want your bracelet to be loose-fitting you should probably choose a bigger size.

You will need:

- A ruler or a measuring tape.
- A rope or a piece of paper.
- A pen.

Option 1 - Tape measure

With your palm open and facing up, roll the tape measure around your wrist and write down the resulting measurement.

Option 2 - Rope or piece of paper

With your palm open and facing up, wrap the rope around your wrist and mark the point where both ends meet, with a pen. Next, determine the size of the measurement by placing the stretched rope next to a ruler.

With the size of your wrist, search the table for the collection of the bracelet you want and find out which size you should choose
