

FIND THE SIZE OF YOUR RING

To know the size of your finger, follow the instructions below and always use the specific size guide to find the ring you want.

You will need:

- A rope or a measuring tape.
- A ruler.

Option 1 - Rope or tape measure

To measure the circumference of your finger, put your palm open and facing up, roll the tape measure around your finger and write down the final measurement. You can also wind a rope around your finger and mark the point at which both ends meet. To determine the size of the measurement, place the stretched rope next to a ruler.

Option 2 - Ruler

With a ruler measure the inner diameter of a ring you already have. Following, look for the equivalence of that measurement in the size chart.

Using the measurement of your finger or the inner diameter of your ring, look in the table for collection of the desired ring and know the size you should choose.

FINDING LOVE

Size	Circumference in mm	Inner diameter in mm
7	47	15
8	48	15,5
9	49	15,75
10	50	16
